(54) Title: DISPENSING APPARATUS FOR DISPOSABLE GLOVES OR LIKE

(57) Abstract: An apparatus (20, 120, 220, 320) for dispensing an item, especially a glove (1, 101, 201, 301), having a body portion and an opening allowing access to the interior of the body portion. The apparatus comprises a chamber (6, 106, 206, 306) having a mouth being shaped and dimensioned to receive the opening of the item so as, to provide a substantially fluid-tight seal at the mouth and such that at least part of the, or each, body portion is located inside the chamber. The apparatus further comprises means (7, 107) for causing a pressure differential between the interior surface and exterior surface of said at least one item. The pressure differential causes the item(s) to expand outwardly and this facilitates the insertion of a hand, or other object, therein.
